October 2025	Human Resources / Competency	ISO 13485 — Clause 6.2

NON-CONFORMITY

Inconsistencies were identified in the implementation of the competency evaluation process. Skill requirements, job descriptions, performance evaluation, and training implementation were not consistently aligned. Evaluation timing and the linkage between identified competency gaps and the training plan were also not clearly defined.

ROOT CAUSE

Lack of clear alignment and monitoring between competency requirements, performance evaluation, and training implementation due to an unclear procedure and insufficient oversight.

ACTIONS TAKEN

1. Reviewed competency and job-description documentation for alignment.
2. Updated the training calendar to include an identified competency-development need.
3. Conducted a review meeting to clarify the evaluation frequency and process.

CORRECTIVE ACTION

1. Define and cascade a Competency and Training Procedure.
2. Clearly establish the frequency and timing of performance / competency evaluations.
3. Link training needs identified during evaluations to the Training Calendar.
4. Update the Training Calendar when competency gaps are identified.

EFFECTIVENESS REVIEW

Effectiveness is reviewed after corrective action implementation to determine whether the updated competency, evaluation, and training process is operating as intended.
