EDUCATION

Bachelor of Science in Information Technology (BS IT) 2006-2010

University of Perpetual Help – Molino Campus Rizal Molino III, Bacoor Cavite PH

SUMMARY

Experienced CCTV and Security Systems technical shift lead with hands-on expertise in the installation, configuration, troubleshooting, and maintenance of surveillance systems in commercial and high-security environments. Skilled in IP-based CCTV systems, access control, structured cabling, and system integration, with a strong understanding of network connectivity and security operations. Known for a practical approach to problem-solving, attention to detail, and the ability to work effectively with project teams, IT personnel, and end users. Experienced in supporting surveillance projects from installation through commissioning, ensuring reliable system performance and compliance with operational requirements. Committed to delivering quality work while maintaining accurate documentation and adapting to evolving security technologies.

TECHNICAL SKILLS

- Surveillance & VMS Architecture: (Synergy, Wisenet) | Hardware Integration Syntectics, Hikvision, Axis, Pelco, Hanwha Hikvision, Dahua.
- Biometrics & Physical Security: Facial Recognition Integration (FRS), Under-Vehicle Inspection (UVIS), Security Access Control SAC, Intrusion/ Intruder Alarms systems, License Plate Recognition (LPR/ANPR).
- Network & Infrastructure: L2/L3 Switch Configuration (Cisco, HP Aruba) | Wireless Networking (Ubiquiti) Data Center | IDF Infrastructure.
- ITSM & System Monitoring: (Checkmk, Nagios) | Incident & Change Management (ServiceNow).
- Networking knowledge: TCP/IP, VLANs, PoE.
- Advanced Diagnostics: Expert in fault-finding and troubleshooting security systems using specialized testing tools.
- Technical Standards: Deep knowledge of wiring, cabling, networking basics, blueprints. Structured Cabling system. Patch Panels, IO Installation.
- Client Relations: Strong communication skills with a proven ability to explain technical issues clearly to clients.
- Working at Heights/ Driving.

PROFESSIONAL EXPERIENCE

2016- PRESENT OKADA MANILA RESORT AND CASINO Manila Philippines

- Managed the daily operation of over 7,200 CCTV/IP network cameras and the core backend networks supporting the entire property's security infrastructure
- Led routine health checks and diagnostic reviews on data center NAS servers to maintain continuous recording and prevent data loss across high-stakes gaming floors.
- Directed regular maintenance programs for IDFs and access rooms, ensuring optimal hardware performance and environment stability.
- Supervised daily technical shifts, coordinating technician workflows for access control, intruder alarm systems, and emergency repair requests.
- Administered multi-brand VMS environments, including Synergy 3, Syntectics, Wisenet, Hikvision, Pelco, Axis and specialized Security Access Control (SAC) software.
- Integrated and calibrated advanced security systems, including Oosto/AnyVision Facial Recognition Systems (FRS), Chemring Under-Vehicle Inspection Systems (UVIS), and automated license plate detection.
- Projects & Commissioning
- Built out electronic security systems from scratch, handling low-voltage tasks such as structured cabling (Cat5e/Cat6), neat patch panel dressing, and IO installations.
- Served as technical lead for surveillance pre-opening setups, managing rapid-deployment camera installations and rush integration projects.
- Designed and executed a site-wide preventative maintenance program that measurably reduced total system failures and hardware downtime.
- Ran end-to-end technical diagnostics and fault-finding to isolate the root cause of hardware, software, and physical network layer issues.
- Coordinated with outside contractors and engineering teams during large-scale property upgrades to ensure compliance with strict gaming regulations.

2013- 2016 Electronic Security System technician CONSOLIDATED GULF Co. Doha,QATAR

Key Responsibilities:

- Installed, configured, and maintained CCTV, access control, and alarm systems using Hikvision platforms (iVMS 4200 and SADP).
- Diagnosed and resolved technical issues related to hardware faults, software configuration, and network/connectivity problems in security systems.
- Performed preventive maintenance and routine inspections to ensure reliability, compliance, and optimal performance of all security equipment.
- Carried out full installation works including cable pulling, wiring, device mounting, system setup, testing, and commissioning.
- Supported alarm system deployment including setup, configuration, testing, and troubleshooting in both residential and commercial environments.
- Responded to service calls and on-site technical issues, ensuring timely resolution and minimal system downtime.
- Worked directly with clients to explain system operations, provide basic user training, and ensure customer requirements were properly met.
- Documented all service work, maintenance activities, and system changes in accordance with company procedures.
- Followed occupational health and safety (OHS) standards during all on-site installations and maintenance activities.
- Collaborated with internal teams to support system upgrades, expansions, and integration of new security technologies.

2010 - 2013 CCTV & ALARM / INTRUSION TECHNICIAN ONE OPSIS INC. MAKATI PH

- Installed and configured electronic security devices including CCTV systems, access control, intrusion alarms, and integrated security solutions.
 - Performed structured cabling works such as cable pulling, wiring, termination, and device installation across commercial and high-security sites.
 - Installed and tested security devices including magnetic locks (maglocks), motion sensors, panic buttons, and magnetic contacts.
 - Conducted preventive maintenance (PMS) for CCTV systems, access control, and alarm systems to ensure stable and reliable performance.
 - Provided 24/7 on-call technical support for troubleshooting, fault diagnosis, and repair of security system issues.
- Delivered full security system installations for high-profile projects including Solaire Casino, RCBC, and Star Cruises, ensuring strict compliance with project timelines, safety standards, and client requirements.

Seminars

- Introduction to Management – Leadership Series Program - 2019
- VMS Synergy Systems Certificate – Accreditation Exam - 2017
- Wisenet Pro CCTV- Hanoi Vietnam - 2024
- License to Exercise Security Profession (LESP) – Security Officer level - 2024
- Smart Coach HR Training - 2025
- Building a high performance team - 2025
- Speaking in public - 2025
- Problem solving and decision making - 2025
- MS Excell & MS Power point - 2025
- Sketch up Pro with Vray - 2025
